NITHYA Yoga: Pranayama & Breathwork Guide

Ancient Yogic Science of Prana & Nervous Regulation

1. Nadi Shodhana Alternate Nostril Breathing

Sit in a comfortable cross-legged posture with spine straight.
Use Vishnu Mudra: fold index and middle fingers.
Inhale through left nostril for 4 counts, close both, retain for 4 counts.
Exhale gently through right nostril for 8 counts.
Balances sympathetic and parasympathetic nervous channels.

2. Kapalabhati Skull Shining Breath

Active forceful exhalations with passive gentle inhalations.
Pumps prana to frontal brain lobes and stimulates Agni digestive fire.
Perform 3 rounds of 30 strokes each followed by slow retention.

3. Bhramari Humming Bee Breath

Close ears with thumbs, eyes with middle fingers.
Take deep inhale, exhale with a soft high-pitched humming sound.
Instantly reduces cortisol, anxiety, and blood pressure.
